## Profile

I am a Full-Stack Developer with solid experience in JavaScript, React, Bootstrap, Python, Flask, and SQL. After years of experience in technical support, providing assistance to a diverse range of users, I am now focusing on web development. I am currently honing my skills in front- and back-end development. My passion is creating comprehensive and functional solutions that enhance the user experience and optimise processes.

## Professional Experience

2008 – 2023
Argentina

**Help Desk**

- Full-Stack Developer with experience in migrating and developing stock management applications, optimizing logistical processes, and integrating functionalities (e.g., report creation and printing). Proven record in technical support, hardware/software installation and maintenance, equipment cloning, and network management through policy configuration and profile management on domain controller to ensure security and operational efficiency.

## Projects
