Immediate availability · Open to relocation across Europe · On-site, hybrid or remote

PROFESSIONAL SUMMARY

IT Support professional with 15+ years of experience providing Level 1 and Level 2 technical support, systems administration and troubleshooting in corporate environments.
Experienced in supporting more than 2,000 users and handling approximately 150–200 technical incidents per week. Strong background in Windows environments, Active Directory, Group Policy, user account administration, hardware and software troubleshooting, network connectivity and remote technical assistance.
Additionally trained in Full Stack Development, with practical knowledge of application development, databases and web technologies. Combines extensive IT support experience with software development skills, problem-solving capabilities and a strong commitment to service quality.

KEY ACHIEVEMENTS

- 2,000+ users supported: technical assistance across a large organisational environment.
- 150–200 weekly incidents: managed a high volume of support requests and troubleshooting tasks.
- 7 locations: participated in implementation and support of printing infrastructure across seven campuses.
- Internal tools: contributed to inventory management solutions using Java and PHP.

PROFESSIONAL EXPERIENCE

Senior IT Support Technician

Pontificia Universidad Católica Argentina (PUCA) · September 2008 – October 2023

- Delivered Level 1 and Level 2 technical support to more than 2,000 users through on-site and remote assistance.
- Managed approximately 150–200 technical incidents per week, troubleshooting hardware, software, operating systems and network connectivity issues.
- Administered Active Directory, including user accounts, access permissions and Group Policy management.
- Installed, configured and maintained Windows workstations, software applications, printers and IT equipment.
- Provided technical support for computer laboratories, audiovisual equipment, videoconferencing systems and institutional events.
- Supported imaging, deployment and workstation recovery processes using tools such as Ghost and Clonezilla.
- Participated in the implementation and maintenance of printing infrastructure across seven institutional locations.
- Contributed to the development of internal inventory management tools using Java and PHP.

Customer Service

Dumpling House, Málaga · December 2025 – July 2026

- Worked in a customer-facing environment, strengthening communication, teamwork and problem-solving skills.
- Adapted to fast-paced operational requirements while maintaining service quality.
