Christian David Villar Colodro

TECHNICAL SUPPORT ENGINEER | SAAS APPLICATION SUPPORT | IT OPERATIONS

Málaga, Spain · +34 601 75 54 38 · christiandvillar@gmail.com · LinkedIn · GitHub

Immediate availability · Open to relocation across Europe · On-site, hybrid or remote

PROFESSIONAL SUMMARY

IT professional with 15+ years of experience in technical support, systems administration and troubleshooting in corporate environments, combined with Full Stack Development training and hands-on experience developing, deploying and troubleshooting web applications and SaaS platforms.
Experienced in supporting more than 2,000 users and handling approximately 150–200 technical incidents per week. Strong background in Windows environments, Active Directory, hardware and software troubleshooting, user support and incident resolution.
Hands-on experience in a multi-product SaaS ecosystem (Dakinis): REST APIs, PostgreSQL/Supabase, Docker, Nginx, Railway, Cloudflare, JWT/OAuth and monitoring. Able to investigate application issues, inspect backend services and collaborate with development teams.

KEY COMPETENCIES

Technical Support & Application Troubleshooting · SaaS · Incident Management · REST APIs · SQL/PostgreSQL/Supabase · Docker, Railway, Nginx, Cloudflare · Windows/AD · JavaScript, React, Node.js · Technical Documentation

PROFESSIONAL EXPERIENCE

Senior IT Support Technician
Pontificia Universidad Católica Argentina (PUCA) · September 2008 – October 2023

- Delivered Level 1 and Level 2 technical support to more than 2,000 users in a large institutional environment.
- Managed approximately 150–200 incidents per week, diagnosing and resolving hardware, software, operating system and connectivity issues.
- Administered Active Directory, user accounts, access permissions and Group Policy configurations.
- Maintained Windows workstations, printers and labs; imaging/recovery (Ghost, Clonezilla); printing across seven locations; videoconferencing support.
- Contributed to internal inventory management solutions developed with Java and PHP.

Customer Service
Dumpling House, Málaga · December 2025 – July 2026

- Worked in a fast-paced customer-facing environment, strengthening communication, teamwork and problem-solving capabilities.

TECHNICAL PROJECT EXPERIENCE

Independent software development projects (Dakinis ecosystem). Not employment at an external SaaS company. Deployed components and public demos; some capabilities are still evolving.

Dakinis Systems — SaaS platform & infrastructure
Independent technology project · multi-product ecosystem

- Designed and maintained a multi-product SaaS ecosystem with shared infrastructure and platform services.
- Nginx, Cloudflare, OAuth/JWT/SSO; Railway deployments; PostgreSQL, Supabase and Docker.
- Operational monitoring (UptimeRobot, Sentry); WAF, rate limiting and secrets management.

Dakinis Core / Dakinis One — Multi-tenant SaaS
Full Stack application development · public demo

- Full Stack components for a multi-tenant platform: CRM, inventory and restaurant operations.
- Frontend/API/PostgreSQL integration; JWT/tenant auth; troubleshooting application and backend issues.

StreamAutomator — Automation platform
Backend & infrastructure · public demo

- Backend Node.js/Express; async jobs with BullMQ and Redis; PostgreSQL/Supabase.
- Services and workers on Railway; scheduling and multi-platform publishing integrations.

AkoeNet — Real-time communication
Full Stack development · public demo

- React/Vite frontend; Node.js/Express backend; Socket.IO real-time; shared Dakinis auth/sessions.

TECHNICAL OPERATIONS & TROUBLESHOOTING

- Diagnosis of HTTP errors (e.g. 502), inter-service connectivity and API endpoint responses.
- Environment variables, DB connections, ports, /health checks, Sentry and Railway/Cloudflare deployments.

TECHNICAL SKILLS

IT Support & Operations
Help Desk L1/L2 · Incident Management · Windows · Active Directory · GPO · Hardware/Software Troubleshooting · Remote Support (TeamViewer, AnyDesk) · Network Troubleshooting

Application Support
Application Troubleshooting · REST APIs · Frontend/Backend Integration · Technical Documentation

Backend & Data
Node.js · Express · Fastify · Python · Flask · PHP · Laravel · PostgreSQL · SQLite · SQL · Supabase · Redis · BullMQ

Infrastructure & Platform
Docker · Railway · Nginx · Cloudflare · OAuth · JWT · SSO · Sentry · UptimeRobot · Git

Frontend
JavaScript · React · Vite · HTML5 · CSS3

EDUCATION

Full Stack Software Developer
4Geeks Academy, Spain · 2024 · 360 hours

Practical training in web application development, databases, APIs and modern development technologies.

Systems Analyst
Instituto Superior Nuestra Señora de las Nieves · 2016

CERTIFICATIONS & TECHNICAL TRAINING

PHP & MySQL · Git · Laravel MVC · REST APIs · Oracle SQL · CCNA training (mixed accreditation: courses and certificates).

LANGUAGES

- Spanish — Native
- English — B2 (self-assessed)
